Collapsable Bulk Box

Quantum's new collapsable bulk box provides a practical approach to large volume or large part material handling, storage and transport. Used for heavy loads, components and even food products, these reusable and returnable containers allow you to ship, handle, pick, store and distribute your products while increasing productivity and profitability. Quantum's collapsable bulk box comes in a standard pallet size footprint measuring 48"L x 45"W. It can be collapsed down to a fraction of its full height in seconds. Bulk containers stack perfectly loaded or when folded down to minimize storage space. They are designed to make the shipping of your products faster, safer and less costly while providing greater protection. Two access drop doors are able to lie flush against the container allowing easy loading and unloading. Manufactured from High Density Polyethylene, this tough container provides superior protection for products while being stored or in transit. Welded base provides greater strength while the reinforced fork openings provide easy lifting. Can withstand temperatures between -20° and 250°F. Available in Black.

Conductive Ultra Stack Bins and Dividers

Protect your electronic components from typical electromagnetic interference *(EMI)*, electrostatic or induced fields with these conductive polypropylene bins. The conductive material provides a barrier which these fields cannot penetrate and prevents the build-up of electrostatic charge. Bins are permanently conductive and are unaffected by washing with normal cleaners. Molded from a carbon filled copolymer polypropylene material with a electrostatic decay rate at less than 0.1 second that meets conductivity standards as tested with ASTM-D257 methods. Its surface resistivity is less than 10^5 Ohms-per square. Easy access to stored items with hopper front bin and label holder provides fast identification. Reinforced side walls and wide ledge allow high stacking on benches or shelving. Be sure all units are properly grounded according to your use. Color is Black.

Conductive Shelf Bins

PRODUCTS MADE IN THE USA

Protect your electronic components from typical electromagnetic interference *(EMI)*, electrostatic or induced fields with these molded, carbon-filled, copolymer polypropylene bins. Surface resistivity is less than 10^5 Ohms-per square. Easy access to stored items with hopper front bin and label holder provides fast identification. The conductive material provides a barrier which these fields cannot penetrate and prevents the build-up of electrostatic charge. Bins are permanently conductive and are unaffected by washing with normal cleaners. Be sure all units are properly grounded according to your application.

PRODUCTS MADE IN THE USA | NSF

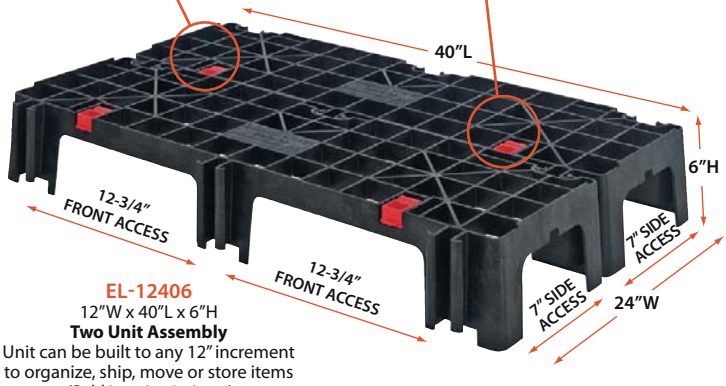

Our Dunnage Racks are as portable as they are versatile. Made from lightweight, heavy-duty high density polyethylene, these are the perfect match for wet or chemically intense manufacturing environments. A simple snap together design makes it a breeze to raise finished goods and raw materials off the ground and away from moisture, dirt and traffic. When it comes to cleanup time, just sweep underneath! We offer the largest commercially available sizes in a high-capacity, low-cost dunnage solution that lets you reset and move workstations as often as you see fit.
