STORE-MAX 8" Shelf Bins

MADE IN THE USA

VIDEO ONLINE

Our 8" high bins offer 95% more storage capacity when compared to the standard 4" high bins and 65% more than the 6" high bins. The new STORE-MAX 8" Bins will truly maximize and organize your space. Manufactured from high density polypropylene, STORE-MAX 8" Shelf Bins are the industry standard for quality. These bins feature a molded-in label holder, built-in rear hang-lock which allows bins to tilt out for complete access when on shelving. A wide hopper front allows complete access to the contents of the bin. Edges are reinforced for added strength. They are designed for 12", 18" and 24" deep shelf units, racks, or standard shelving. Optional dividers are a perfect accessory to subdivide and keep parts separated as needed. See ***pg. 23*** to order Clear Bins.

Conductive Ultra Stack Bins & Dividers

MADE IN THE USA

Protect your electronic components from typical electromagnetic interference *(**EMI**)*, electrostatic or induced fields with these conductive polypropylene bins. The conductive material provides a barrier which these fields cannot penetrate and prevents the build-up of an electrostatic charge. Bins are permanently conductive and are unaffected by washing with normal cleaners. Molded from a carbon filled copolymer polypropylene material with an electrostatic decay rate at less than 0.1 second that meets conductivity standards as tested with ASTM-D257 methods. Its surface resistivity is less than 10^5 Ohms-per square. Easy access to stored items with hopper front bin and label holder provides fast identification. Reinforced side walls and wide ledge allow high stacking on benches or shelving. Be sure all bins are properly grounded according to your use.

Polymer Dunnage Racks

Our Dunnage Racks are as portable as they are versatile. Made from lightweight, heavy-duty high density polyethylene, these are the perfect match for wet or chemically intense manufacturing environments. A simple snap together design makes it a breeze to raise finished goods and raw materials off the ground and away from moisture, dirt and traffic. When it comes to cleanup time, just sweep underneath! We offer the largest commercially available sizes in a high-capacity, low-cost dunnage solution that lets you reset and move workstations as often as you see fit. Plus, the grid-top design simplifies working with fluids and bagged goods because any spilled items will flow through the surface to the floor below.
